The Color “Mist” sets tone.

Introduced at Spring Market this new Sunbrella color resonates.

It's All In The Bag!

For the past **ten years** we have given our **Sunbrella** bags as gifts to the press and furniture buyers. These bags have come in many different sizes, fabric designs and styles. They have become “collectors items” and we have been asked by retailers to make them available to sell. What do you think?

At **Miles Talbott** this spring, 2012 we introduced a new color palette called “Mist.” We wanted a serene, elegant look to our bedroom suite and believed this soft monotone look would make any room a **restful retreat**. These days of hectic lifestyles,

long commutes and busy social schedules make the home a needed refuge from the outside world. **Joe Ruggiero** has created a group of **Sunbrella** fabrics that work with this new color to create **restful and relaxing environments**.

AMERICAN COUNTRY STYLE MAKES FOR A RELAXING ENVIRONMENT.

Ever since we introduced our new fabrics made with recycled yarn from **Sunbrella**, we have received many comments on the soft hand and wearability of the collection. The look of denim for most any room, makes for an easy care environment. At the **Joe Ruggiero Collection**, we want our environments to

be **kid and pet friendly** and we want our customers to enjoy and live in their rooms.

*“I can remember as a kid we were not allowed in the living room on a daily basis; only for holidays and special events. Children should enjoy every room and I want to design furniture & fabrics that can **make every room, a room to enjoy**,”* states **Joe Ruggiero**.
